(54) CONNECTION BODY OF ARTICLE PACKAGING SINGLE BODY

(57)Abstract:

PROBLEM TO BE SOLVED: To easily cut and peel a tape piece or the like by arranging an attachment part only on an article storage part, and forming perforations on a non-attachment part in a connection body in which a plurality of article packaging single bodies provided with the article storage part and its peripheral edge part are lapped with their position shifted from each other, and attached using the tape piece or the like.

SOLUTION: An article packaging single body 1 is provided with a circular storage part 11 in which soiced hams are stored, and a rectangular peripheral edge part 12 located on the peripheral edge. A connection body A is formed by attaching upper and lower surfaces of a large number of article packaging single bodies 1 lapped with their position shifted from each other by a tape piece 2 or a label on which perforations 21 are formed. A part on an upper surface of each article storage part 11 is attached to each other at the attachment part of the tape piece 2, a part of the perforations 21 formed in the tape piece 2 is arranged on each peripheral edge part 12, and no tape piece 2 is attached to each peripheral edge part 12. Each article packaging single body 1 is easily separated from the connection body A and the tape piece 2 is easily peeled from each article packaging body 1.
